SHBCC Use of Changing Rooms and Showering Facilities Policy

This policy applies to the arrangements for both adults, young people and children using changing facilities.

At no time should children and adults use the same changing facilities at the same time when at SHBCC.

Whenever possible:

- Adults must not change, or shower, at the same time using the same facility as children - if the same changing room is used for both, then adults and children must use the facilities at separate times.
- If adults and children need to share a changing facility, they must do so at separate times.
- Mixed gender teams must have access to separate male and female changing rooms.
- Due to the risks of inappropriate photography or filming, mobile phones must not be used in changing rooms.

If children are uncomfortable changing or showering at the club, no pressure should be placed on them to do so. It is always acceptable for younger members of the club to change in their home environment
